Services and Prices for Vaccination/Microchipping Clinic, March 20th, 2011

Vaccinations: (Core vaccines are appropriate for all horses; supplemental vaccines determined by risk factors)

| Core Vaccines: | |
|--|------|
| Eastern / Western Encephalomyelitis (EWT) | \$14 |
| West Nile Virus | \$34 |
| Rabies | \$16 |
| Supplemental Vaccines: | |
| Rhinopneumonitis / Influenza (for horses heavily exposed to other horses; should be repeated every six months) | \$25 |
| Rattlesnake Venom Toxoid (for horses heavily exposed to snakes; requires an initial series of three doses, i. e., the primary and two boosters a month apart) | \$46 |
| Strep. Equi (Strangles) This vaccine is given intranasally (in the nose), and is easily aerosolized, and is a modified live bacterium, so risky in crowded areas. All horses to be vaccinated with this will be vaccinated as a group at the down-wind side of the fairgrounds, at the conclusion of the clinic in the afternoon. We recommend it only for horses likely to be exposed (not many). | \$33 |

Services:

| | |
|--|-----------|
| Microchipping: (Includes, microchip, initial registration, sedation if needed, and chip implantation) | \$60 |
| Dental / oral examination: (To determine need for dental work, and level of severity; includes sedation, if needed). Selected dates will be available for the work to be done at your home with no call fee: (a savings of \$85) | No Charge |
| Dentistry, including tranquilization, full mouth speculum, use of manual and motorized instruments, as needed, and pain medication, as needed. Does not include complicated extractions, or antibiotics. | |
| Level 1 | \$125 |
| Level 2 | \$150 |
| Level 3 | \$175 |
| Deworming: (Depends on size of horse, and product selected) | \$10—\$25 |
| Fecal testing: (Quantitative, McMasster's; to help assess parasite burden). Can also be done on samples from horses not there that day. | \$17 |
| Coggin's Testing: (for horses going out of state within the next 5 months, and a few other special circumstances) | \$25 |

Please note: We will not be able to do problem-based examinations for chronic conditions, such as lameness or skin problems; these will require regular appointments, or can be co-ordinated with dental work. As always, emergencies such as lacerations and colics will be accommodated.
